

A woman with her eyes closed is lying down, wearing a light grey hooded sweatshirt. She is positioned next to a dark-colored horse, whose head and neck are visible in the background. The scene is set against a dark, textured wall.

CARE FOR THE RIDE

Mustang Sportswear was founded in 2021 with a vision to bring a new level of exquisite Nordic functionality and exceptional quality into equestrian fashion.

Merging simplicity with sporty luxury, Mustang Sportswear rethinks the meaning of equestrian refinement and creates pieces that can also be worn outside of the stables. In other words, we combine our love of equestrian sport and nature with our background in fashion. The result is a wardrobe merged of stylish leisurewear and highly functional products.

As a brand firmly rooted in Nordic nature and with a deep love for horses, Mustang Sportswear is profoundly committed to incorporating sustainability into our design and development. It is important for us to minimize our environmental footprint – that's why we also ask you to Care for the ride and take good care of your Mustang Sportswear.

Kind regards,

Stine Andrea Kok

Designer, Mustang Sportswear

It must be meaningful

As a production company and in a world of overproduction, we strive to question how we may have the most positive impact possible. The garments we make should not be a burden to the environment.

Mustang Sportswear aspires to implement as many sustainable initiatives as we can. We are always learning and seek to get better every day. Both by using sustainable materials in the development of our garments and making them as durable as possible.

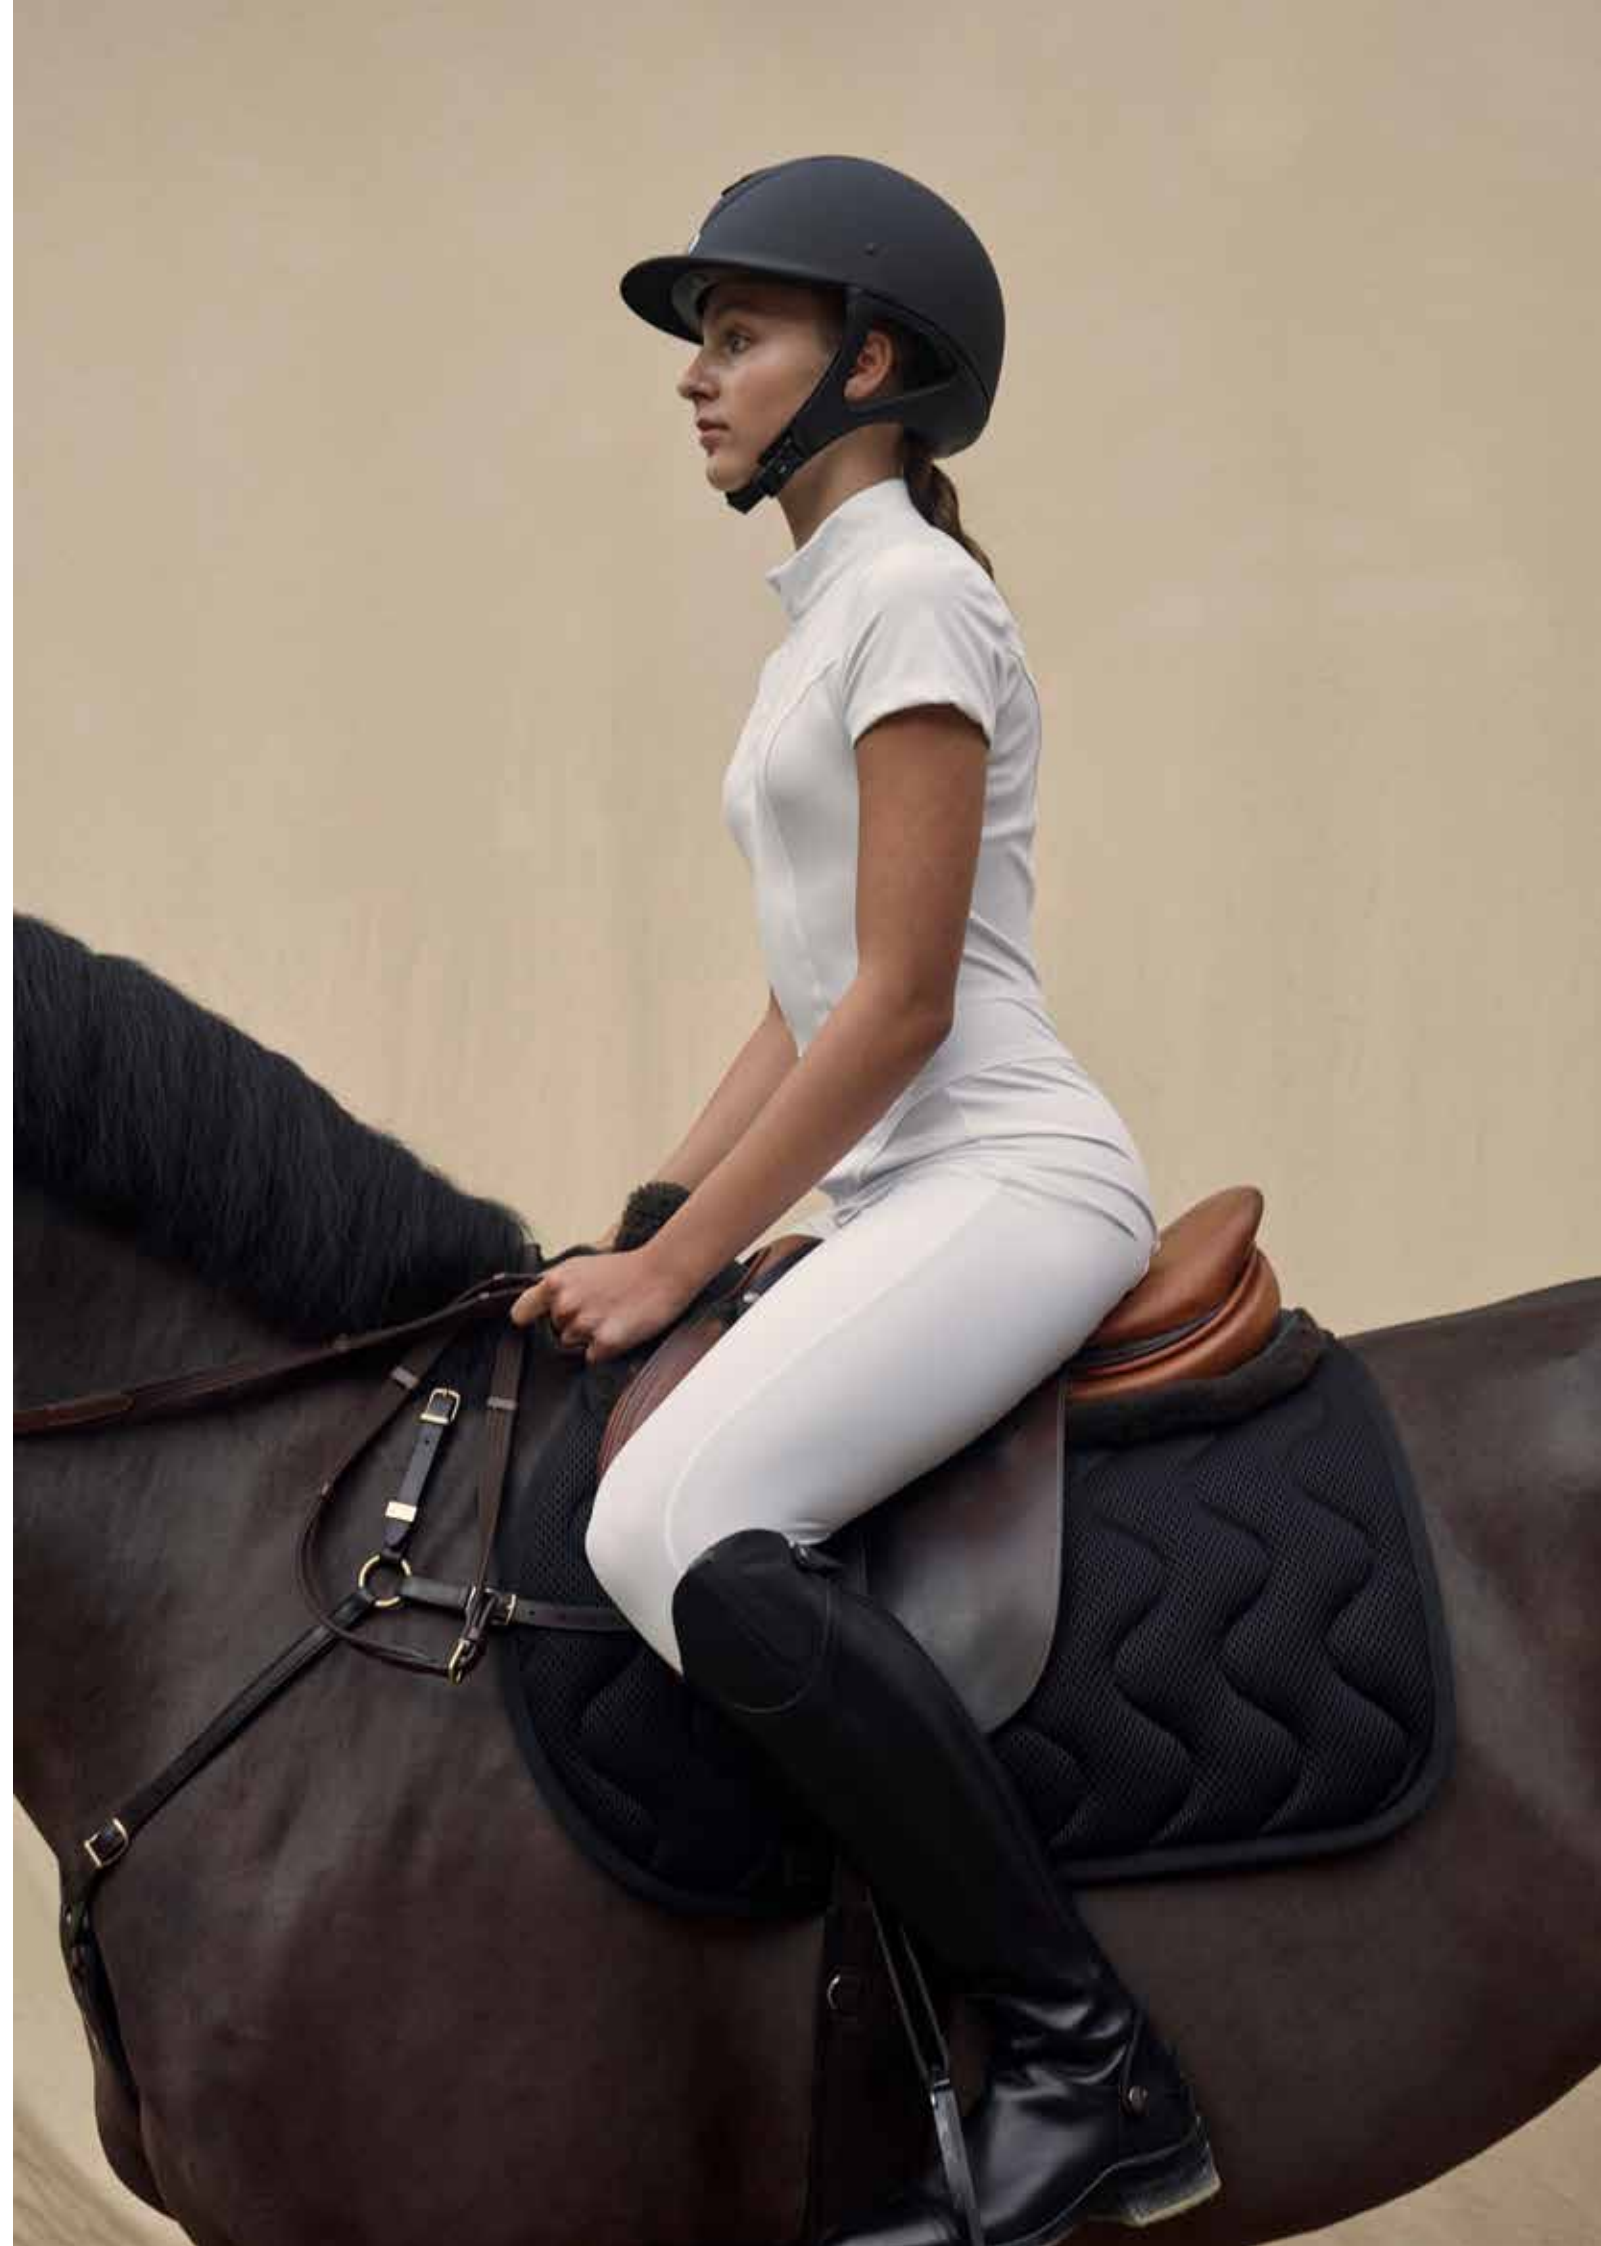

We want you to take good care of the products and keep them as a treasured companion while doing what you love. That means that neither fit, comfort, nor performance is a hindrance. Your Mustang Sportswear items are created with the ambition to become classics with a long-lasting nature.

For you to feel comfortable, our clothes are created from organic fabrics, natural materials, and recycled performance textiles that work in sync with the body and the elements.

For us, textile technology begins with sustainability.

We don't believe that anyone needs more clothes. Instead, they need better clothes. That's why we hope you will

Care for the ride.
